# BUILDING THE NGI

## Welcome to the NGI Forum 2017 in Barcelona!

Through presentations, open discussions, and workshops, the Forum aims to make a strong contribution to the dialogue on the NGI. With presenters and attendees representing the main actors and stakeholders from the research community, SMEs & start-ups, industry, policy makers, and civil society, this is a unique opportunity for each of us to share our knowledge with leading experts from a wide range of disciplines, including privacy and trust technologies, blockchain, decentralised data governance, edge intelligence discovery and identification, and more.

The Forum is the place where to work together towards laying the foundation of openness, inclusivity, transparency, privacy, cooperation, and protection of data embodied in the NGI initiative.

We're looking forward to a stimulating and successful exchange of ideas over the coming days. Feel free to join the online discussion by following **@NGI4EU** and **#NGIForum17** on twitter.
